SUMMARY

I'm an undergraduate student pursuing a degree in computer science. My passion is to create innovative mobile and web applications. My journey begins in high school, realizing how important softwares is in helping human lives. Driven by curiosity, I continued my journey in the world of software development, enhancing experiences and skills, pushing through every boundary and challenges met. Throughout my academic journey, I've had the privilege of working on a diverse range of projects, each with its own unique challenges and growth opportunities. From designing intuitive user interfaces to implementing robust backend systems, developing software have also made me realize how important teamwork is. Beyond the technical skills I have, I pride myself on having great communication and team working skills. I believe communication and team working skills is one of the most important aspects when developing a software. Ensuring user goals and needs are fulfilled

EDUCATION

BINUS University

2022 – 2026

Undergraduate Student of Computer Science

Software Engineering Streaming Course

Cumulative GPA: 3.69/4.0

Relevant Coursework: Algorithm and Data Structures, Software Engineering, Human and Computer Interaction (UI/UX Design), Agile Software Development, Code Reengineering, Database Technology, and Object Oriented Programming.

Pelangi Kasih School

2020 – 2022

High School Diploma

Natural Sciences Achieved
